EDUCATION

Degree / Board	Institute	Year	Marks (%)
B. Tech. in Electronics and Communication Engineering	Madan Mohan Malaviya University of Technology, Gorakhpur	2020 - 2024	73.40
Class XII (CBSE Board)	St. Marys Convent School, Varanasi	2019	93.60
Class X (CBSE Board)	St. Marys Convent School, Varanasi	2017	91.20

EXPERIENCE

CAD Engineer **Sevya IT** **Jan 2025 - Present**

- Collaborating with **Analog Devices India**, developed an automation code using **Python** and **SKILL programming** that generates a Unified Component Libraries for Allegro and Virtuoso.
- The code validates whether generation has faults and creates summarized reports using **HTML** & **CSS.**

Summer Trainee **Bharat Heavy Electricals Limited, Varanasi** **Jul 2023 - Aug 2023**

- Experienced with Computerised Numerical Controlled- **CNC** which controls various heavy engineering components.

Summer Trainee **Indian Railways (Signal & Telecom Training Centre)** **Jun 2023 - Jul 2023**

- Acquired comprehensive knowledge on entire **Data logging** process used for the maintenance and control of the commanding centre. I also developed proficiency in managing various signalling protocols and effectively handling substantial datasets.

Web Development **OASIS Pvt. Ltd.** **Jun 2023 - Jul 2023**

- Using HTML, CSS and JavaScript created a responsive and user-friendly front-end of the website. The project was an Ecommerce Platform for sneakers.

PROJECTS

UCL gen and UCL qa

Technologies Used: Python, HTML, CSS, Linux, Perforce, Virtuoso Schematic and Layout, SKILL

- At ADI, working on automation code that generates a unified component of library which can be used for both Allegro and Virtuoso. It firstly monitors whether new components are added then generates symbols and its layout simultaneously.
- The QA parts validate whether the Gen part is completed properly and also provides visual report of the assessment using **HTML and CSS**

AI-powered IoT System for Early Detection of Plant Diseases

Technologies Used: Arduino UNO R3, ESP32-CAM, LCD Display, C++, Python

- Designed a device using **ESP32-CAM**, **Arduino Uno**, and a **Flask server** with a **CNN model** to **detect plant diseases from leaf images**. Enabling real-time accurate disease detection and alerts, enhancing agricultural productivity.

JamAlong: AI-Assisted Collaborative Media Rooms

Technologies Used: AI Prompting, HTML5, CSS3, JavaScript, Git/GitHub

- Developed an interactive web platform leveraging AI-assisted coding tools, allowing users to create or join shared rooms for synchronized YouTube viewing and collaborative Jamalong sessions.
- Created real-time engagement features such as synchronized playback controls, in-app messaging, voice communication, reactions, and meeting-style audio/video and screen-sharing capabilities.

SKILLS

Technical Skills	Python (Object Oriented, NumPy Operations, File Handling, Pandas), SKILL, C++, HTML, CSS, JavaScript, Prompt Engineering, Generative AI, AI-assisted Coding and Web Development, Object-Oriented Programming (OOP), DSA, SQL, Operating Systems, Computer Networks
Tools & Software's	Cadence Allegro, Cadence Virtuoso (Layout and Schematic), DE-HDL, Visual Studio Code, Microsoft
Soft Skills	Time management, Communication, Adaptability, Problem-solving, Teamwork, Creativity
